List of Contents

NUMBER 1

Jeffery K. Cochran, Arvindh Murugan and Vijayalakshmi Krishnamurthy	1	Generic Markov models for availability estimation and failure characterization in petroleum refineries
Guisseppi A. Forgionne	13	Determining the financial feasibility of privatized military housing initiatives with DSS-delivered quantitative models
Francesca Fumero	33	A modified subgradient algorithm for Lagrangean relaxation
Prakash L. Abad	53	Optimal price and order size for a reseller under partial backordering
Kun-Jen Chung and Chuan-Neng Lin	67	Optimal inventory replenishment models for deteriorating items taking account of time discounting
Sharmila Shah, John E. Mitchell and Michael Kupferschmid	85	An ellipsoid algorithm for equality-constrained nonlinear programs

NUMBER 2

Chi Chiang	93	A note on optimal policies for a periodic inventory system with emergency orders
James R. Swisher, Sheldon H. Jacobson, J. Brian Jun and Osman Balci	105	Modeling and analyzing a physician clinic environment using discrete-event (visual) simulation
Scott Webster and Meral Azizoglu	127	Dynamic programming algorithms for scheduling parallel machines with family setup times
A. Sedeño-Noda and C. González-Martín	139	An algorithm for the biobjective integer minimum cost flow problem
W.K. Yeung, Ceyda Oguz and T.C. Edwin Cheng	157	Single-machine scheduling with a common due window
Wei-Chang Yeh	177	Search for MC in modified networks
W.J. Hurley	185	The analytic hierarchy process: a note on an approach to sensitivity which preserves rank order

NUMBER 3

Marcos Singer	193	Decomposition methods for large job shops
Gianfranco Corradi	209	Higher-order derivatives in linear and quadratic programming
J. Leon Zhao and Hsing Kenneth Cheng	223	Graph indexing for spatial data traversal in road map databases
E. Mijangos and N. Nabona	243	On the first-order estimation of multipliers from Kuhn–Tucker systems
Julia A. Bennell, Kathryn A. Dowsland and William B. Dowsland	271	The irregular cutting-stock problem – a new procedure for deriving the no-fit polygon

NUMBER 4

Alex Van Breedam	289	Comparing descent heuristics and metaheuristics for the vehicle routing problem
Micha Mandel and Gur Mosheiov	317	Minimizing maximum earliness on parallel identical machines
Shine-Der Lee	329	On solving unreliable planar location problems
Kun-Nyeong Chang and Dongwoo Kim	345	Optimal prioritized channel allocation in cellular mobile systems
B.P.M. Duarte	357	The expected utility theory applied to an industrial decision problem — what technological alternative to implement to treat industrial solid residuals
G. Peter Zhang, B. Eddy Patuwo and Michael Y. Hu	381	A simulation study of artificial neural networks for nonlinear time-series forecasting

NUMBER 5

Yun Seong Eum, Kyung Sam Park and Soung Hie Kim	**397**	Establishing dominance and potential optimality in multi-criteria analysis with imprecise weight and value
Cem Canel, Basheer M. Khumawala, Japhett Law and Anthony Loh	**411**	An algorithm for the capacitated, multi-commodity multi-period facility location problem
O. Berman and K.P. Sapna	**429**	Optimal control of service for facilities holding inventory

I.M. Premachandra	**443**	An approximation of the activity duration distribution in PERT
S. Kalpakam and S. Shanthi	**453**	A perishable inventory system with modified $(S-1, S)$ policy and arbitrary processing times
Mani K. Agrawal and Salah E. Elmaghraby	**473**	On computing the distribution function of the sum of independent random variables
Jae Kyeong Kim and Sang Hyun Choi	**485**	A utility range-based interactive group support system for multiattribute decision making

NUMBER 6

Jianzhong Zhang, Chao Yang and Yixun Lin	**505**	A class of bottleneck expansion problems
Hong-fei Teng, Shou-lin Sun, De-quan Liu and Yan-zhao Li	**521**	Layout optimization for the objects located within a rotating vessel — a three-dimensional packing problem with behavioral constraints
James E. Falk and Vladimir E. Karlov	**537**	Robust separation of finite sets via quadratics
Tariq Aldowaisan	**563**	A new heuristic and dominance relations for no-wait flowshops with setups
Ling Wang and Da-Zhong Zheng	**585**	An effective hybrid optimization strategy for job-shop scheduling problems
Jaejin Jang, Jungdae Suh and C. Richard Liu	**597**	A new procedure to estimate waiting time in GI/G/2 system by server observation

NUMBER 7

Bertrand M.T. Lin and T.C. Edwin Cheng	613	Batch scheduling in the no-wait two-machine flowshop to minimize the makespan
Min-Sheng Lin, Ming-Sang Chang, Deng-Jyi Chen and Kuo-Lung Ku	625	The distributed program reliability analysis on ring-type topologies
Sheng-Pen Wang	637	Shape-preserving computation in economic growth models
Sakib A. Mondal and Anup K. Sen	649	Single machine weighted earliness–tardiness penalty problem with a common due date
Herbert Dawid, Johannes König and Christine Strauss	671	An enhanced rostering model for airline crews

Christos Koulamas and George J. Kyparisis	689	The three-stage assembly flowshop scheduling problem
Jatinder N.D. Gupta and Johnny C. Ho	705	Minimizing makespan subject to minimum flow-time on two identical parallel machines

NUMBER 8

Gur Mosheiov	719	A common due-date assignment problem on parallel identical machines
Chiun-Ming Liu	733	Primal-dual methods for sustainable harvest scheduling problems
Chia-Shin Chung and James Flynn	751	A newsboy problem with reactive production
Cüneyt F. Bazlamaçcı and Khalil S. Hindi	767	Minimum-weight spanning tree algorithms A survey and empirical study
Dirk Biskup and Martin Feldmann	787	Benchmarks for scheduling on a single machine against restrictive and unrestrictive common due dates
Yupo Chan, William B. Carter and Michael D. Burnes	803	A multiple-depot, multiple-vehicle, location-routing problem with stochastically processed demands
Jacinto González-Pachón and Carlos Romero	827	Aggregation of partial ordinal rankings: an interval goal programming approach

NUMBER 9

In Lee	835	Artificial intelligence search methods for multi-machine two-stage scheduling with due date penalty, inventory, and machining costs
M.I. Vidalis and H.T. Papadopoulos	853	A recursive algorithm for generating the transition matrices of multistation multiserver exponential reliable queueing networks
Veronique Inghelbrecht, Bart Steyaert, Herwig Bruneel and Sabine Wittevrongel	885	Buffer contents and cell delay in a rate adaptation buffer with Markovian arrivals
N.C. Simpson	899	Questioning the relative virtues of dynamic lot sizing rules
K.-J. Chung and S.-F. Tsai	915	Inventory systems for deteriorating items with shortages and a linear trend in demand-taking account of time value

NUMBER 10

C.W. Chu, B.E. Patuwo, A. Mehrez and G. Rabinowitz	935	A dynamic two-segment partial backorder control of (*r, Q*) inventory system
Shengxiang Yang and Dingwei Wang	955	A new adaptive neural network and heuristics hybrid approach for job-shop scheduling
A. Krishnamoorthy and P.V. Ushakumari	973	*k*-out-of-*n*: *G* system with repair: the *D*-policy
Peter Preston and Erhan Kozan	983	An approach to determine storage locations of containers at seaport terminals
Toshitsugu Otake and K. Jo Min	997	Inventory and investment in quality improvement under return on investment maximization
Lawrence David Drees and Wilbert E. Wilhelm	1013	Scheduling experiments on a nuclear reactor using mixed integer programming
A.J. Higgins	1039	A dynamic tabu search for large-scale generalised assignment problems

NUMBER 11

Hanif D. Sherali, Burak Özdaryal, Warren P. Adams and Naguib Attia	1049	On using exterior penalty approaches for solving linear programming problems
Jacques A. Ferland, Soumia Ichoua, Alain Lavoie and Eric Gagné	1075	Scheduling using tabu search methods with intensification and diversification
Chih-Hsiung Wang and Shey-Heui Sheu	1093	Simultaneous determination of the optimal production–inventory and product inspection policies for a deteriorating production system
Jason Chao-Hsien Pan, Jen-Shiang Chen and Hung-Liang Cheng	1111	A heuristic approach for single-machine scheduling with due dates and class setups
Ibrahim Abdulla Ibrahim and Said M. Selim	1131	Shortest paths in a lattice network: a comparative study

Note

K.F. Lam, H.W. Mui and H.K. Yuen	1141	A note on minimizing absolute percentage error in combined forecasts

NUMBER 12

Roman Novak, Jože Rugelj and Gorazd Kandus	1149	A note on distributed multicast routing in point-to-point networks
Jamal Ouenniche and Fayez F. Boctor	1165	The multi-product, economic lot-sizing problem in flow shops: the powers-of-two heuristic
Guoqiang Peter Zhang	1183	An investigation of neural networks for linear time-series forecasting
S. Kar, A.K. Bhunia and M. Maiti	1203	Inventory of multi-deteriorating items sold from two shops under single management with constraints on space and investment
U. Al-Turki, C. Fedjki and A. Andijani	1223	Tabu search for a class of single-machine scheduling problems
Raymond L. Major and Cliff T. Ragsdale	1231	Aggregating expert predictions in a networked environment
Note		
Han-Lin Li and Jung-Fa Tsai	1245	A fast algorithm for assortment optimization problems

NUMBER 13

Ingo Hofacker and Rudolf Vetschera	1253	Algorithmical approaches to business process design
Yi-Kuei Lin	1277	A simple algorithm for reliability evaluation of a stochastic-flow network with node failure
Rafael Martí and Vicente Estruch	1287	Incremental bipartite drawing problem
Dieter Fiems, Bart Steyaert and Herwig Bruneel	1299	Performance evaluation of CAI and RAI transmission modes in a GI-G-1 queue
S. Kar, A.K. Bhunia and M. Maiti	1315	Deterministic inventory model with two levels of storage, a linear trend in demand and a fixed time horizon
Stan Lipovetsky and W. Michael Conklin	1333	Multiobjective regression modifications for collinearity
Hong Suk Choi, Heesoo Lee, Ki-Dong Lee, Sehun Kim and Jong Hyup Lee	1347	Optimal locations of switches and interconnections for ATM LANs

NUMBER 14

Young H. Chun	1367	Optimal partitioning of groups in selecting the best choice
M. Reza Zamani	1387	A high-performance exact method for the resource-constrained project scheduling problem
Adil Baykasoğlu and Nabil N.Z. Gindy	1403	A simulated annealing algorithm for dynamic layout problem
Eiji Takeda	1427	A method for multiple pseudo-criteria decision problems
Ming-Jong Yao	1441	The peak load minimization problem in cyclic production
